

Shelby Kelley

Technical Product / Program Manager

(860) 605-3748 · shelbya.kelley@gmail.com · linkedin.com/in/shelbyakelley · github.com/ShelbyKelley

SUMMARY

Technical Product/Program Manager with 8 years in software development, including 5 years leading engineering teams. Combines hands-on technical fluency with program management practice, including Agile/Scrum facilitation, stakeholder communication, cross-team dependency coordination, and risk management, to turn ambiguous requirements into shipped outcomes. Track record of independently owning delivery under fixed deadlines, translating technical work for non-technical stakeholders, and building organizational buy-in for new initiatives.

CORE COMPETENCIES

Technical Program Management · Cross-Functional Team Leadership · Agile & Scrum (Certified ScrumMaster) · Stakeholder Management · Client & Vendor Communication · Risk Management · Requirements Gathering · Roadmap Planning & Prioritization · SDLC · CI/CD · Security & Compliance · Mentorship & Team Development · Kanban & Sprint Planning

EXPERIENCE

Senior Software Engineer, HeroDevs (Remote)

June 2022 – Present

- Led a 3-person cross-functional team through a fixed 3-month deadline for an international client migration, using kanban-based sprint planning, daily standups, and weekly stakeholder demos to align scope and manage risk.
- Coordinated shared-component dependencies with a parallel engineering team working the same codebase, resolving cross-team conflicts through structured client communication; delivered on time and the client retained the company for further engagements.
- Independently own prioritization and delivery of security research and remediation work, publishing CVEs and applying patches under recurring deadline pressure with no formal PM support.
- Partner directly with enterprise clients to scope and de-risk legacy system migrations, translating technical complexity into clear stakeholder communication.

Lead Software Engineer, Camp Bow Wow

June 2021 – June 2022

- Led end-to-end delivery of a custom invoicing system spanning frontend and backend, managing scope, technical risk, and timeline as both project lead and contributing engineer.
- Built team capability through structured mentorship, elevating engineering quality and reducing onboarding friction for junior engineers.

Software Engineer, Sila Solutions Group

June 2018 – June 2021

- Served as primary point of contact between engineering and business stakeholders, translating ambiguous requirements into actionable, prioritized work within an Agile workflow.
- Led front-end delivery and contributed to full-stack architecture decisions across enterprise and mobile product lines.

Software Engineer Intern, Optum (UnitedHealth Group)

June 2017 – August 2017

- Identified a gap in secure data-testing workflows, built a PHI/PII anonymization tool, and pitched it directly to leadership, securing executive approval for enterprise-wide rollout.

EDUCATION

B.S. Computer Science, Central Connecticut State University (2015–2018)

B.A. Anthropology, Central Connecticut State University (2008–2012)

Certified ScrumMaster (CSM), 2022
